~~This is a conditional approval, subject to compliance with the following comments, project specification and QIC acceptance.~~

1.~~The DMV Control Center shall support NTCIP protocols and shall be compliant with ONVIF standards for~~ interoperability with ITS field devices and CCTV systems

2.How many CCTV cameras, DMS, vehicle detection cameras, RFID detectors, and other ITS equipment can DMV control center manage?

3. Is it scalable to control more ITS equipment in the future apart from current project scope?

4.Provide at least three user official references with a minimum one year of performance experience.

5.Does the DMV Control Center operate on a local license, allowing access for multiple government agencies and locations?

6.Is it ~~independently licensed with no expiration and no online verification required?~~

7.Ensure that all ITS subsystems listed in the project BOQ can be integrated with the DMV control system, and ~~indicate other systems that can also be integrated~~

8.How many simultaneous users can the system support without performance degradation, and can it be ~~scaled in the future to accommodate more users?~~
